RATE/RULE

To Whom It May Concern:

NCMIC Insurance Company (NCMIC) currently has on file with the Illinois Division of Insurance a claims made and occurrence professional liability rating manual for our chiropractic malpractice program. Under separate cover, NCMIC has submitted an endorsement filing. Attached here, please find the corresponding rating manual which has been amended to include updated rules for the new and revised endorsements. Please note that no changes have been made to the base rates, increase limits factors or claims made step factors that are currently on file. In comparison to the currently approved rating manual, the substantive changes are as follows:

- We have replaced the word "free" with the phrase "at no additional charge" under the Basic Reporting Extension section on page 9 and under Items 5 and 6 of the Illinois Extended Reporting Endorsement section on pages 11-12.
- We have updated the Illinois Extended Reporting Endorsement edition date on page 9.
- We have updated the rating manual language regarding the calculation of tail coverage under item 4 on page 11 to match the language contained on page 9. Please note that this is only a wording change and that we have not changed the way we calculate extended reporting.
- We have removed the phrase "to apply to individuals total policy premium" under the Claims Free Discount section on page 13 because the first paragraph under this section already explains the application of the discount.
- We have updated the edition date of the Temporary Leave of Absence Endorsement and Illinois Active Military Duty Endorsement on pages 16-17, and we have added a sentence to clarify that the suspension of coverage does not apply to any professional entities.
- We have added the new Delegation of Certain Policy Rights Endorsement on page 17.
- We have added the new Dual License – Massage Therapy Endorsement on page 17

Our actuaries did not conduct a rate study in support of this filing as it was not warranted due to the minor changes being made. In addition, this filing does not impair the previous rate state study performed by Milliman in our filing ADV Rate 2004. Enclosed, please find a certification signed by our Chief Financial Officer certifying that appropriate consideration has been given to the applicable factors specified in 215 ILCS 5/155.18.

Please note that NCMIC gathers and reports statistics to the National Independent Statistical Service (NISS).

If you have any questions or require any additional information regarding this filing please, feel free to contact me directly. I thank you in advance for your attention to this matter.

Dear Ms. Neuman,

NCMIC has not applied any schedule rating debits to any Illinois insured, so changing the breadth of the schedule rating debits from 40% to 25% does not affect any policyholders in Illinois.

Thanks,

Juliana Frank

Ms. Frank,

We are aware that this filing was originally submitted with a requested effective date of June 1, 2008.

During the actuarial review, changes for the schedule credits and debits were submitted. We do not allow two effective dates for one filing. To conclude this filing with a filed effective date of June 1, 2008, we would require NCMIC rerate all policies pursuant to the changes for the schedule credits and debits as of June 1, 2008 and provide the number of policyholders affected, the amounts of refunds (\$0 - \$99, \$100 - \$199, \$200 - \$299, etc.), and provide a copy of the letter that was or will be sent to the policyholders acknowledging such changes.

Your prompt response is appreciated.

Ms. Frank,

I am reviewing the final copy of the manual placed in the filing. It appears this filing also shows changes that were made in filing #2008 Chiro Rev Rule that was submitted in November, 2008. Therefore, I question what the actual effective date would be. Please advise.

NCMIC Insurance Company may utilize the following schedule of debits to modify the premiums for certain insureds reflecting the unique exposure present in these risks. These insureds qualify for schedule rating because of factors not contemplated in the filed rate structure of the company.

The maximum debit to be applied to recognize risk characteristics that are not reflected in an otherwise applicable rate is 40%. Any debits assigned under this plan are subject to annual review. All premium modifications will be noted and documented in the individual insured's file with any premium credit and/or debit having the approval of the Underwriting Department.

NCMIC Insurance Company will modify premiums giving consideration to the following exposure characteristics and rating characteristics of a risk:

	<u>CREDIT</u>	<u>DEBIT</u>
Unusual risk characteristics (Member of multidisciplinary group, multiple professional discipline or board complaints, loss of license)	XXXX	40%
Claim history debit (Based on underwriting review of frequency and severity of the insured's claims history)	XXXX	40%

Section IV – Extended Reporting Coverages For Claims Made Coverage

Basic Reporting Extension

This allows, under a claims made policy, for the reporting of claims arising from a medical incident which occurs on or after the retroactive date and prior to the end of the policy period. The extended reporting coverage is for sixty (60) days after the expiration of the policy. This coverage is provided at no additional charge. The 60-day Basic Extended Reporting Period does not apply if the insured purchases any subsequent insurance that replaces in whole or in part the coverage provided by this policy.

Illinois Extended Reporting Endorsement (Tail Coverage) Form 14CM-2005 07/07

If a claims made policy is canceled or non-renewed for any reason including non-payment of premium whether by the company or at the insured's request, the named insured may elect to have an endorsement issued providing an extended reporting period upon payment of an additional charge as follows:

Tail factors apply to mature claims made expiring annual premium.

Number of Years
Since Retro Date

Tail Factor (Factor to apply to mature
claims made expiring annual premium)

1
2

0.654
0.975

1 or 2 or 3 or 4+ years

Mature claims made base premium \$3,129

Tail factor for 1 year x 0.654

Extended Reporting Period Premium 1 yr. = \$2,046.00

d. Count the remaining number of days left until the policy termination date.

1-1-05 to 3-28-05 is 87 days.

e. Pro-rate the remaining number of days to the policy cancellation date.

Partial year rates will be interpolated using the actual number of days covered on a claims made basis.

The calculation requires first determining the premium for two full year of tail coverage.

Mature claims made base premium \$3,129

Tail factor for 2 years x 0.975

Extended Reporting Period Premium 2 yrs. = \$3,051.00

Calculation:

Extended Reporting Period Premium 2 yrs. (\$3,051.00) – Extended Reporting Period Premium 1 yr. (\$2,046.00) = \$1,005.00

Number of days 87
Number of days in year 365

f. Calculate: $(87 / 365) \times \$1005.00 = \240.00

Extended Reporting Period Premium 1 yr. \$2,046.00 + \$240.00 = \$2,286.00

4. Tail coverage is priced at the rules and rates in effect at policy termination.

5. Tail coverage is provided at no additional charge if a doctor dies and will be provided to the insured's estate upon notification of the insured's death. Tail coverage is provided at no additional charge if a doctor becomes permanently disabled and can no longer practice as a chiropractor. Tail coverage is provided at no additional charge if a doctor retires from practice after five (5) years of continuous coverage under the NCMIC claims made policy and is at least 55 years old. The endorsement will date back to the current claims made policy retroactive date.

Section III – Premium Development

A. FORMULAS FOR CLAIMS MADE PREMIUM DEVELOPMENT

Listed below are the formulas used to determine a chiropractor's claims made policy premium.

STEP 1 – Calculate Base Premium

Base Rate

Base rate is our 100/300 limit of liability. The charges are:

Territory 1-	\$2232.00
Territory 2-	\$2443.00
Territory 3-	\$2150.00

Territory 1 - Cook, DuPage, Lake, Will, Kendall, Kane and McHenry Counties
 Territory 2 - Monroe, St. Clair, Madison, Clinton, Washington, Randolph and Jersey Counties
 Territory 3 - Remainder of state

Base Premium Developed

Base Rate x ILF = Base Premium

Base premium is determined by multiplying the base rate by the increased limits factor of the appropriate limit of liability chosen.

ILFs (Increased Limits Factors)

200/600	1.159
250/750	1.215
500/1000	1.408
1000/3000	1.590
2000/4000	1.741

Round to the nearest whole dollar. Round up if .50 or greater. Round down if .49 or lower.

- c. Date of claim
- d. Frequency of Claim
- 4. Any possible current claims and/or incidents
- 5. Declined, canceled or refused renewal for coverage

Round to the nearest whole dollar. Round up if .50 or greater. Round down if .49 or lower.

STEP 2 – Calculate 1st yr., 2nd yr., 3rd yr., 4th yr. or Mature Claims Made Base Premium

Base premium x (1-4 yr. or mature) retro factor = (1-4 yr. or mature) claims made base premium

Claims Made Premium Developed

The (1-4 yr. or mature) claims made premiums are then calculated by multiplying the base premium by the appropriate years (1-4 yr. or mature) retro factor. The retroactive date is the date of reference used to determine which retro factor is to apply. The following rules will apply:

Definition Retroactive Date – Date on a claims made liability policy which triggers the beginning period of insurance coverage. If the chiropractor is purchasing insurance for the first time, the retroactive date will be the effective date. Any claim made during the policy period will not be covered if the injury occurred before the retroactive date.

Eligibility for 1st year claims made rate – When a policy is written where the retroactive date and effective date are the same, we will multiply the first year claims made retro factor by the base premium.

Eligibility for 2nd year claims made rate – When a policy is written during the first calendar year after the retroactive date we will multiply the second year claims made retro factor by the base premium.

Eligibility for 3rd year claims made rate – When a policy is written during the second calendar year after the retroactive date, we will multiply the third year claims made retro factor by the base premium.

Eligibility for 4th year claims made rate – When a policy is written during the third calendar year after the retroactive date, we will multiply the fourth year claims made retro factor by the base premium.

Eligibility for Mature claims made rate – When a policy is written during the fourth calendar year after the retroactive date or anytime thereafter, we will use the mature claims made rate. The retro factor is 1.00.

Claims Made Rate Retro Factors

<u>Maturity</u>	<u>Retro Factors</u>
1	0.350
2	0.655
3	0.900
4	0.975
Mature	1.000

STEP 3 – Calculate 1st yr., 2nd yr., 3rd yr., 4th yr. or Mature Claims Made Discounted Premium

STEP 2 – Calculate 1st yr., 2nd yr., 3rd yr., 4th yr. or Mature Claims Made Base Premium

Base premium x (1-4 yr. or mature) retro factor = (1-4 yr. or mature) claims made base premium

Claims Made Premium Developed

The (1-4 yr. or mature) claims made premiums are then calculated by multiplying the base premium by the appropriate years (1-4 yr. or mature) retro factor. The retroactive date is the date of reference used to determine which retro factor is to apply. The following rules will apply:

Definition Retroactive Date – Date on a claims made liability policy which triggers the beginning period of insurance coverage. If the chiropractor is purchasing insurance for the first time, the retroactive date will be the effective date. Eligibility for 4th year claims made rate – When a policy is written during the third calendar year after the retroactive date, we will multiply the fourth year claims made retro factor by the base premium.

Eligibility for Mature claims made rate – When a policy is written during the fourth calendar year after the retroactive date or anytime thereafter, we will use the mature claims made rate. The retro factor is 1.00.

Claims Made Rate Retro Factors

STEP 3 – Calculate 1st yr., 2nd yr., 3rd yr., 4th yr. or Mature Claims Made Discounted Premium

Formula for Discounted Premium (Premium when any discounts apply)

$$\frac{(1-4 \text{ yr. or mature) claims made discounted premium}}{\text{base premium} \times \text{discount factor(s)}}$$

The following discounts are to be pro-rated if added mid-term.

Discount factors

Part-time	0.50
Semi-retired	0.50
Disabled	0.50
Faculty	0.50
1 st Year Licensure	0.25
2 nd Year Licensure	0.60
3 rd Year Licensure	0.75
4 th Year Licensure	0.85

Endorsement Premium Development

$$\frac{\text{Endorsement premium}}{\text{premium}} = (1-4 \text{ yr. or mature) claims made base premium} + \text{endorsement premium}$$

Endorsements added mid-term are to be pro-rated.

Professional Entity Coverage Premium Developed

$$\frac{\text{Professional Entity coverage premium}}{\text{Professional Entity factor}} = (1-4 \text{ yr. or mature) claims made base premium} \times \text{Professional Entity factor}$$

Professional Entity factors

Shared limit of liability	No charge
Shared limit of liability with MD/DO Exposure	0.55 per entity
Separate limit of liability	.20 for the first entity .05 for each additional entity

Definition of Tail Coverage – This term has been used to describe the exposure that exists between the retroactive date and expiration date of the policy and the coverage that may be purchased to cover that exposure. On “claims made” forms, tail coverage may be purchased to extend the period for reporting covered claims beyond the policy period.

Extended Reporting Endorsement (Tail Coverage)

Tail Coverage Rules:

1. Purchase of tail coverage must be within sixty (60) days after the cancellation or expiration of the insured’s NCMIC claims made policy.

Example:

Policy expires 6-1-05. The extended reporting endorsement (tail coverage) must be purchased by 7-30-05.

2. The extended reporting endorsement (tail coverage) will never be written to be effective before the insured’s most recent NCMIC claims made policy retroactive date.

Example:

The insured’s claims made policy retroactive date is 7-1-05 and expiration date is 10-1-05. The extended reporting endorsement (tail coverage) charged at the first year tail coverage rate would be written to cover the time period from 7-1-05 to 10-1-05.

3. The extended reporting endorsement (tail coverage) will be pro-rated for partial years.

Example:

An insured has a malpractice insurance policy with us issued with a \$1,000,000/\$3,000,000 limit of liability. The insured has a retroactive date of 1-1-04 and the insurance policy is canceled with us on 3-28-05. The charge for the insured’s tail coverage premium has been computed below.

- a. You first must determine how many days between the retroactive date and the cancellation effective date.
- b. Determine the MATURE claims made base premium for the policy limits the chiropractor is requesting to purchase.

The calculation is as follows:

Base rate \$1,788 x (Increased limits factor) 1.75 = mature claims made base premium
\$3,129.00.

- c. Determine how many years, or days, the retroactive date is from the policy termination (cancellation or expiration) date.

Retroactive date 1-1-04 to full year policy renewal date of 1-1-05.

Retroactive date 1-1-04 to full year policy renewal date of 1-1-05.

1 or 2 or 3 or 4+ years

Mature claims made base premium		\$3,129
Tail factor for 1 year	x	0.654
Extended Reporting Period Premium 1 yr.	=	\$2,046.00

d. Count the remaining number of days left until the policy termination date.

1-1-05 to 3-28-05 is 87 days.

e. Pro-rate the remaining number of days to the policy cancellation date.

Partial year rates will be interpolated using the actual number of days covered on a claims made basis.

The calculation requires first determining the premium for two full year of tail coverage.

Mature claims made base premium		\$3,129
Tail factor for 2 years	x	0.975
Extended Reporting Period Premium 2 yrs.	=	\$3,051.00

Calculation:

Extended Reporting Period Premium 2 yrs. (\$3,051.00) – Extended Reporting Period Premium 1 yr. (\$2,046.00) = \$1,005.00

Number of days	87
Number of days in year	365

f. Calculate: $(87 / 365) \times \$1005.00 = \240.00

Extended Reporting Period Premium 1 yr. \$2,046.00 + \$240.00 = \$2,286.00

4. Tail coverage is priced at the rules and rates in effect ~~as of the most recent effective date of the policy to which the extended reporting period endorsement is attached.~~
5. ~~Tail coverage is free of charge if a doctor dies and will be provided to the insured's estate upon notification of the insured's death. Tail coverage is free of charge if a doctor becomes permanently disabled and can no longer practice as a chiropractor. Tail coverage is free of charge if a doctor retires from practice after five (5) years of continuous coverage under the NCMIC claims made policy and is at least 55 years old. Section III – Premium Development

A. FORMULAS FOR CLAIMS MADE PREMIUM DEVELOPMENT

Listed below are the formulas used to determine a chiropractor's claims made policy premium.

STEP 1 – Calculate Base Premium

Base Rate

Base rate is our 100/300 limit of liability. The charges are: Territory 1- \$2232.00
Territory 2- \$2443.00
Territory 3- \$2150.00

Territory 1 - Cook, DuPage, Lake, Will, Kendall, Kane and McHenry Counties
Territory 2 - Monroe, St. Clair, Madison, Clinton, Washington, Randolph and Jersey Counties
Territory 3 - Remainder of state

Base Premium Developed

Base Rate x ILF = Base Premium

Base premium is determined by multiplying the base rate by the increased limits factor of the appropriate limit of liability chosen.

ILFs (Increased Limits Factors)

200/600	1.159
250/750	1.215
500/1000	1.408
1000/3000	1.590
2000/4000	1.741

Round to the nearest whole dollar. Round up if .50 or greater. Round down if .49 or lower.

STEP 2 – Calculate 1st yr., 2nd yr., 3rd yr., 4th yr. or Mature Claims Made Base Premium

Base premium x (1-4 yr. or mature) retro factor = (1-4 yr. or mature) claims made base premium

Claims Made Premium Developed

The (1-4 yr. or mature) claims made premiums are then calculated by multiplying the base premium by the appropriate years (1-4 yr. or mature) retro factor. The retroactive date is the date of reference used to determine which retro factor is to apply. The following rules will apply:

Definition Retroactive Date – Date on a claims made liability policy which triggers the beginning period of insurance coverage. If the chiropractor is purchasing insurance for the first time, the retroactive date will be the effective date. Any claim made during the policy period will not be covered if the injury occurred before the retroactive date.

Eligibility for 1st year claims made rate – When a policy is written where the retroactive date and effective date are the same, we will multiply the first year claims made retro factor by the base premium.

Eligibility for 2nd year claims made rate – When a policy is written during the first calendar year after the retroactive date we will multiply the second year claims made retro factor by the base premium.

Eligibility for 3rd year claims made rate – When a policy is written during the second calendar year after the retroactive date, we will multiply the third year claims made retro factor by the base premium.

Eligibility for 4th year claims made rate – When a policy is written during the third calendar year after the retroactive date, we will multiply the fourth year claims made retro factor by the base premium.

Eligibility for Mature claims made rate – When a policy is written during the fourth calendar year after the retroactive date or anytime thereafter, we will use the mature claims made rate. The retro factor is 1.00.

Claims Made Rate Retro Factors

<u>Maturity</u>	<u>Retro Factors</u>
1	0.350
2	0.655
3	0.900
4	0.975
Mature	1.000

Round to the nearest whole dollar. Round up if .50 or greater. Round down if .49 or lower.

STEP 3 – Calculate 1st yr., 2nd yr., 3rd yr., 4th yr. or Mature Claims Made Discounted Premium

Formula for Discounted Premium (Premium when any discounts apply)

(1-4 yr. or mature) claims made discounted premium = (1-4 yr. or mature) claims made base premium x discount factor(s)

Discount factors

Part-time	0.50

Faculty	0.50
1 st Year Licensure	0.25
2 nd Year Licensure	0.60
3 rd Year Licensure	0.75
4 th Year Licensure	0.85

Endorsement Premium Development

Endorsement premium = (1-4 yr. or mature) claims made base premium + endorsement premium

Endorsements added mid-term are to be pro-rated.

Professional Entity Coverage Premium Developed

Professional Entity coverage premium = (1-4 yr. or mature) claims made base premium x Professional Entity factor

Professional Entity factors

Shared limit of liability	No charge
Shared limit of liability with MD/DO Exposure	0.55 per entity
Separate limit of liability	.20 for the first entity .05 for each additional entity
Separate limit of liability with MD/DO Exposure	2.20 for the first entity 0.55 for each additional entity

Professional Entity Factors

Shared limit of liability	No charge
Shared limit of liability with MD/DO Exposure	0.55 per entity
Separate limit of liability	.20 for the first entity .05 for each additional entity

Occurrence Discounted Premium with Endorsements

Formula: Occurrence discounted premium + endorsement premium

Round to the nearest whole dollar. Round up if .50 or greater. Round down if .49 or lower.

C. SCHEDULE RATING APPLICABLE TO BOTH CLAIMS MADE AND OCCURRENCE COVERAGES

NCMIC Insurance Company may utilize the following schedule of debits to modify the premiums for certain insureds reflecting the unique exposure present in these risks. These insureds qualify for schedule rating because of factors not contemplated in the filed rate structure of the company.

The maximum debit to be applied to recognize risk characteristics that are not reflected in an otherwise applicable rate is 25%. Any debits assigned under this plan are subject to annual review. All premium modifications will be noted and documented in the individual insured's file with any premium credit and/or debit having the approval of the Underwriting Department.

NCMIC Insurance Company will modify premiums giving consideration to the following exposure characteristics and rating characteristics of a risk:

	<u>CREDIT</u>	<u>DEBIT</u>
Unusual risk characteristics (Member of multidisciplinary group, multiple professional discipline or board complaints, loss of license)	XXXX	25%
Claim history debit (Based on underwriting review of frequency and severity of the insured's claims history)	XXXX	25%

Section IV – Extended Reporting Coverages For Claims Made Coverage

The extended reporting coverage is for sixty (60) days after the expiration of the policy. This coverage is provided at no additional charge. The 60-day Basic Extended Reporting Period does not apply if the insured purchases any subsequent insurance that replaces in whole or in part the coverage provided by this policy.

Definition of Tail Coverage – This term has been used to describe the exposure that exists between the retroactive date and expiration date of the policy and the coverage that may be purchased to cover that exposure. On “claims made” forms, tail coverage may be purchased to extend the period for reporting covered claims beyond the policy period.

Extended Reporting Endorsement (Tail Coverage)

Tail Coverage Rules:

1. Purchase of tail coverage must be within sixty (60) days after the cancellation or expiration of the insured’s NCMIC claims made policy.

Example:

Policy expires 6-1-05. The extended reporting endorsement (tail coverage) must be purchased by 7-30-05.

2. The extended reporting endorsement (tail coverage) will never be written to be effective before the insured’s most recent NCMIC claims made policy retroactive date.

Example:

The insured’s claims made policy retroactive date is 7-1-05 and expiration date is 10-1-05. The extended reporting endorsement (tail coverage) charged at the first year tail coverage rate would be written to cover the time period from 7-1-05 to 10-1-05.

3. The extended reporting endorsement (tail coverage) will be pro-rated for partial years.

Example:

An insured has a malpractice insurance policy with us issued with a \$1,000,000/\$3,000,000 limit of liability. The insured has a retroactive date of 1-1-04 and the insurance policy is canceled with us on 3-28-05. The charge for the insured’s tail coverage premium has been computed below.

- a. You first must determine how many days between the retroactive date and the cancellation effective date.
- b. Determine the MATURE claims made base premium for the policy limits the chiropractor is requesting to purchase.

The calculation is as follows:

Base rate \$1,788 x (Increased limits factor) 1.75 = mature claims made base premium
\$3,129.00.

- c. Determine how many years, or days, the retroactive date is from the policy termination (cancellation or expiration) date.

Retroactive date 1-1-04 to full year policy renewal date of 1-1-05.

JUL 01 2008

1 or 2 or 3 or 4+ years

Mature claims made base premium		\$3,129
Tail factor for 1 year	x	0.654
Extended Reporting Period Premium 1 yr.	=	\$2,046.00

d. Count the remaining number of days left until the policy termination date.

1-1-05 to 3-28-05 is 87 days.

e. Pro-rate the remaining number of days to the policy cancellation date.

Partial year rates will be interpolated using the actual number of days covered on a claims made basis.

The calculation requires first determining the premium for two full year of tail coverage.

Mature claims made base premium		\$3,129

6. Risk Management Discount

We offer risk management discounts for insureds that complete NCMIC Board certified programs. The risk management discount will only be applied to the doctor's base premium. The maximum total risk management discount available per policy period is 15%. The discount will only be applied on the insured's renewal premium.

Maximum Discounts Available

The maximum risk management and claims free discounts that can be obtained are 35%. However, the maximum risk management and claims free discounts available for any insured who is also receiving a premium discount will be the actual risk management and claims free discounts (up to 35%) multiplied by percentage of discounted premium paid by the policyholder.

Example: Assume the full-time base rate is \$1,500 and a doctor is receiving a faculty discount of 50%. Also assume the doctor is eligible for a 20% claims free discount and a 15% risk management discount. In this example, the maximum risk management and claims free discount this doctor is entitled to is 17.5%. Premium to be paid is calculated as follows:

$\$1,500 \times .50 =$	\$750 (faculty base premium)
$(20\% + 15\%) \times .50 =$	17.5% (total discounts allowed)
$\$750 \times 17.5\% =$	131.25 (discount amount)
$\$750 - 131.25 =$	\$618.75 (premium to be paid)
